HEALTH PROMOTION
comparative data online

TEAviisari is an online service for making visible municipalities’ activities to promote their residents’ health and well-being. It supports municipalities and regions in the planning and management of health promotion work.

The dimensions of health promotion capacity building (TEA) describe the activities from various perspectives. The key idea is that efficient high-quality activities require that municipalities take these dimensions into account.

SEVEN DIMENSIONS OF HEALTH PROMOTION

<table>
<thead>
<tr>
<th>Dimension</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMMITMENT</td>
<td>The organisation’s commitment to health promotion at strategic level.</td>
</tr>
<tr>
<td>MANAGEMENT</td>
<td>The organisation and implementation of health promotion as well as the definition of responsibilities.</td>
</tr>
<tr>
<td>MONITORING AND NEEDS ASSESSMENT</td>
<td>Monitoring of health and welfare determinants in the population, assessment of the needs of different population groups, and reporting of results to the management and elected officials.</td>
</tr>
<tr>
<td>RESOURCES</td>
<td>Resourcing of health promotion, including skills and dimensioning of staff among others.</td>
</tr>
<tr>
<td>COMMON PRACTICES</td>
<td>Agreements on common practices.</td>
</tr>
<tr>
<td>PARTICIPATION</td>
<td>The population’s opportunities to take part in the development and assessment of activities.</td>
</tr>
<tr>
<td>OTHER CORE FUNCTIONS</td>
<td>Sector-specific core functions in health promotion that must be in place in every organisation.</td>
</tr>
</tbody>
</table>

FREE AND OPEN ACCESS ONLINE SERVICE

You can compare data by municipalities, schools and educational institutions, providers of education and social and health services, regions and regional state administrative agencies, as well as at the level of the whole country.
COMPARE and analyse strengths and development targets

RELIABLE DATA TO SUPPORT MANAGEMENT AND PLANNING

You can compare health promotion capacity building in various sectors in your municipality or region:

- Total result
- Municipal management
- Basic education
- Upper secondary schools
- Vocational schools
- Physical activity
- Primary health care
- Services for older people

EASY TO USE AND DISPLAY

TEAvisari collates data supplied by municipalities and various statistics.

- The indicator and statistical data are pre-analysed and rated.
- Strengths and development targets are illustrated using the colours of the traffic light.
- Data are updated regularly, enabling you to follow the progress of the activities.
- The service is available in three languages: Finnish, Swedish and English.
Why use TEAVIISARI?

Decision-makers must know how the municipality is promoting health and welfare. By examining data from different sectors you can locate the key strengths and development targets in the municipality. You have reliable data for finding out how your municipality fares compared to other municipalities and the whole country.

TEAviisari helps you in the planning of activities. It provides you with pre-analysed data you can use in drafting your school’s student welfare plan and your municipality’s health and welfare report, for example. Being aware of the state of activities helps you to set concrete targets and monitor their implementation.

Health promotion work is made transparent and concrete, which makes it easier to monitor. Data are available for organisation members and staff, elected officials as well as municipal residents.
