

# Alcoholic beverage consumption 2022

## Total alcohol consumption decreased by 1.2% - consumption at licensed establishments increased by 34.0%

### MAIN FINDINGS

Per resident aged 15 or over in 2022:

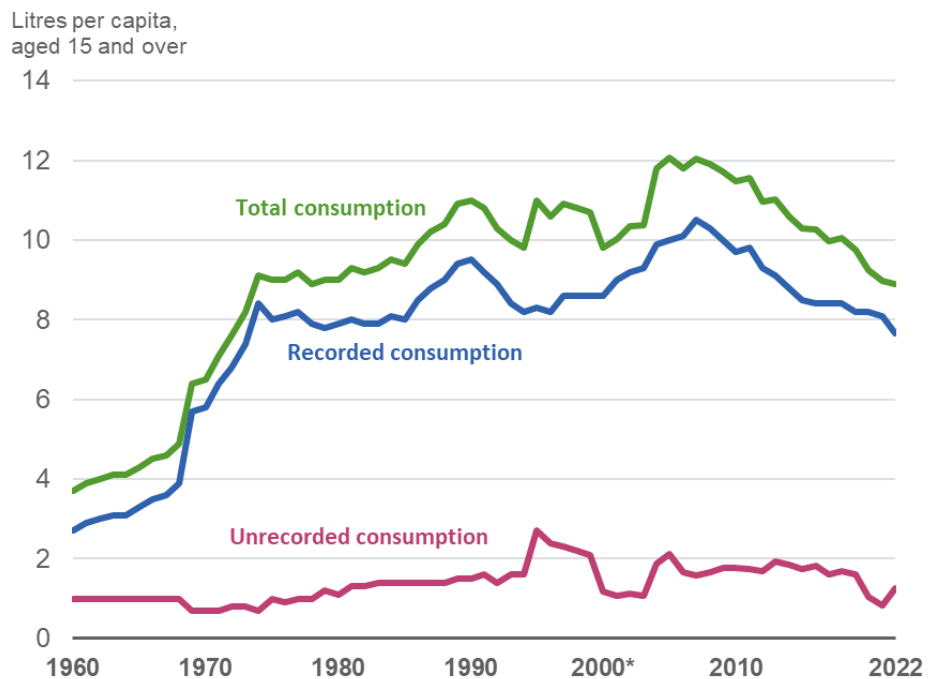

- Total alcohol consumption decreased by 1.2% compared to 2021.
- Total alcohol consumption was 8.9 litres measured as 100% alcohol.
- Recorded alcohol consumption, i.e. sales of alcoholic beverages in Finland, decreased by 6.3 per cent compared to 2021.
- Unrecorded consumption (imports by tourists and online alcohol purchases from abroad) increased by 49%.
- Retail consumption, i.e. alcohol purchased from grocery stores and Alko, accounted for 75 per cent of total alcohol consumption.

The total consumption of alcoholic beverages in 2022 was 8.9 litres of 100% alcohol per resident aged 15 or over. Total consumption decreased by 1.2% from 2021. In the longer term, overall consumption has largely decreased since 2007. (Figure.)

Total consumption covers both recorded and unrecorded consumption. Recorded consumption includes consumption at licensed establishments and retail consumption, while unrecorded consumption covers imports by travellers and online purchases. In 2022, the decrease in the total consumption of alcoholic beverages was mainly due to a decrease in retail consumption (-10.1%). As retail consumption accounted for a significant share of total consumption, totalling 75%, its downward trend influenced total consumption, more than the growth of unrecorded consumption and consumption at licensed establishments. Measured as 100% alcohol, the unrecorded consumption of residents aged 15 or over increased by 48.6 per cent and the consumption of alcoholic beverages at licensed establishments by 34.0 per cent compared to 2021.

Overall, the recorded consumption of alcoholic beverages (e.g. restaurants, grocery stores and similar combined) decreased by 6.3 per cent to approximately 7.6 litres of 100% alcohol per resident aged 15 or over. Unrecorded consumption measured as 100% alcohol was 1.3 litres per resident aged 15 or over. Of this consumption, the purchase of alcoholic beverages from foreign online shops decreased by 22%, while passenger imports increased by 172% compared to 2021.

**Figure. Consumption of alcoholic beverages measured as 100% alcohol per resident aged 15 or over 1960–2022, litres**

\*) Unrecorded consumption: A change in the statistical method since 2000.

2015	8 242	0,4			2 435 898	4,5
2016	8 392	1,8			2 474 889	1,6
2017	8 576	2,2			2 537 936	2,5
2018	8 313	-3,1			2 856 924	12,6
2019	9 687	16,5	909		2 969 992	4,0
2020	9 892	19,0	1 305	43,6	3 100 160	4,4
2021	10 198	3,1	1 470	12,6	3 231 267	4,2
2022	10 345	1,4	1 448	-1,5	3 375 321	4,5

1) Until 2017, ≤4.7%.

2) As from 2019, the new licence types introduced in the reform of the Alcohol Act are included in the count. The number of licences in 2019 is therefore not entirely comparable with the previous years.
